**A. E. MICHAEL,**  
A GOOD PLACE TO TRADE.

### Baron—Pattie.

On Tuesday Aug. 4th, at Spruce Grove Lutheran church Miss Amalia Baron (daughter of Mr. and Mrs. Jacob Baron) was united in marriage to Mr. D. W. Pattie, of Blairmore. The ceremony was performed by the pastor, Rev. G. Postach.

Miss Helen Baron (sister to the bride) was bridesmaid, and John Eberhardt (of Edson) was groomsmen. The flower girls were Miss Julia Miller and Miss Martha Baron (sister to the bride).

On the conclusion of the service at the church, a reception was held at the home of the bride's parents, where the bridal party and invited guests sat down to a sumptuous repast.

The bride is a well-known and popular young lady of Stony Plain district. She has been employed for some time in the local phone exchange, where she was noted for her courtesy and many kindly ways.

Mr. Pattie has been on the staff of the Provincial Police for a number of years, and was in charge of the local detachment for a few months, in 1924. Since that time he has been stationed at Drumheller and Blairmore.

The Newly-weds left by the midnight train for a short stay at Jasper, and later will go on to Vancouver for a ten day visit. On their return, they will take up their residence at Blairmore, where Mr. Pattie holds a Police appointment.

A crowd of friends were at the station, and caught the bridegroom in a happy mood. He is said to have donated \$25 toward a charity party.

The many friends of bride and groom in town and district wish the happy couple a long and prosperous life.

### Warning to Motorists!

Complaints are being received all over the province by the Provincial Police with respect to glaring headlights on motor vehicles.

The unthinking motorist drives along the highway at night with a glare light which he refuses to dim when approaching a car going in the opposite direction. This is not only irritating to the party meeting such lights, but is also very dangerous.

Motor traffic is increasing very rapidly and this menace, being an infraction of The Vehicles & Highway Traffic Act, is going to be dealt with very severely.

The Police have strict orders to check this practice and prosecute without warning any infraction of the Act in this respect.

We would advise all motorists, the next time they are in a garage, to get their lights tested and if necessary adjusted to the proper and lawful requirements.

### Beware the Harness Thief.

Farmers are advised to keep their work harness locked up securely at nights. Several thefts of harness in the Wetaskiwin district were reported early last week. It was thought these were committed by a party operating from the City. The theft took place Saturday night of two sets of work harness from the barn of Mr. Suter, near Winterburn. The only clue left was marks where a light car had been drawn to the roadside near the scene of the theft.

On Monday morning the theft of two sets of work harness from the barn of Mr. Rohl Benerlein was reported; and also a set of work harness from the stable of Mr. Marcon, nearby.

### CLOSING NOTICES.

The business houses and the three elevators in Stony Plain close every Wednesday at 1 p. m. during August.

### LOCAL NEWS.

Mr. and Mrs. Jas. Malloch have taken up their residence at Edmonston Beach.

Mr. Thackeray of Calgary was visiting this week with Mr. James Smith.

Mrs. N. Kowalechuk from Edson is visiting with Mr. and Mrs. M. Gambel, north of town.

Mr. D. W. Pattie motored up from Blairmore to Stony on Sunday last.

Miss Maie Bleaken, Grand Prairie, visited friends in Stony over the week-end.

M. B. McColl, Edmonton was a Sunday visitor in Stony.

Mr. Arthur Graden is up from Calgary this week.

Mr. J. M. Kullander and Miss Annie Kullander moved Saturday to their cottage at the Beach.

A very successful tea was held in Ducholke's hall by the Girls' Club of the W. L.

Capt. Heichen took his foot-batters out to the Bench last week and beat the Rotary boys 2 goals to 0.

Evangelists D. E. Reimer and B. A. Reile, who have been holding religious services at Spruce Grove for the past few weeks are now conducting services at Stony Plain every evening in their tent on Main Street.

Stony Plain Women's Institute are holding their annual picnic at Edmonston Beach on Wednesday Aug. 12. In view of the fact that this will be Stony Plain's civic holiday the idea is to make the affair a combination community picnic. Parties will bring their baskets and share up. Cars will leave Stony Plain at 10:30 a. m., bringing the big feed on about noon hour. Transportation will be provided for everyone wishing to join in.

A carload of twine arrived this week for Oppertshauser & Sons. This is the 2d carload which has arrived in town this season. Present crop conditions justify the belief that this will be a record year for the demand of binder twine. The normal supply averages over 4 carloads, for here, and it is expected that this will be surpassed this season. The price of twine is a slight advance on last year's figure.

### A Hint To Our Towns

Townpeople, says a Western farm paper, are notoriously ready to give advice to the farmers, and it asks, why should not the farmer who takes pride in his farm and his home give a little good advice to his grocer and garage man and lumber dealer and hardware merchant. It therefore proposes, on behalf of its farmer subscribers, to tell the townspeople some home truths.

Trees and flowers, beautiful homes, with attractive surroundings, are, says this paper, to be found in practically every farming district in the West, but the towns and villages are lagging far behind and most of them are becoming uglier and more hideous with the years. Unpainted stores, unattractive shacks in many cases to begin with, ramshackle outbuildings and sheds, down-at-the-heels fences and weedy, neglected gardens—how many of the country towns in the West answer this description?

The word picture sketched by this farm paper is by no means overdrawn. While the cities and farmers by the thousands, have gone in extensively for the planting of trees and the beautifying of the surroundings in which the people pass their lives, very few towns and villages have made any effort to make them attractive. Most of them present the appearance of a group of squatters' huts, occupied by transients, having no intention of remaining permanently and establishing real homes, but expecting to move on. They give the impression of "boom" oil and mining towns where anything is good enough for the time being until the boom bursts and the town dies.

Country roads are frequently better than these town and village streets with their gutters overgrown with grass and weeds, and with backyards and lanes common dumping grounds for refuse and junk of all kinds. In such surroundings it is little wonder that very soon store windows remain unwashed and in a generally unkempt, untidy, dirty condition. A city store which presented the same indications of sloth would drive away rather than invite customers. Yet many town and village merchants wonder why people pass their doors to trade elsewhere.

Complaint is also voiced because of the difficulty of obtaining and retaining the services of qualified help in these smaller communities. But why should any self-respecting, ambitious young man or woman settle down to spend their lives in a town or village where the people lack even sufficient enterprise to paint their buildings, tidy up their premises, and convert their half-painted streets into avenues of trees, and their private grounds into flower and neat vegetable gardens?

Speaking for the farmers by the paper already quoted says: "A clean, bright, cheerful town certainly makes a better bid for business than a shabby and ugly one, and when everybody has a car the progressive town will draw the trade." Absolutely true! Shakespeare said, "The apparel oft proclaims to the world its progressiveness or lack of it." A shabby, unpainted, neglected-looking collection of buildings is not apt to impress a prospective buyer or new citizen as being the home of up-to-date merchants where good value for his money can be obtained.

Western towns and villages should also appreciate the fact that the motor car and the rapid extension of systems of good roads is working a revolution in the tourist trade—and a lucrative trade it is. Motor tourists arriving at a neglected looking town quickly pass on, but a town of neat, nicely painted buildings, well-kept streets, trimly kept gardens, and an attractive little square or park, invites a stop. It is in such towns tourists stop for the night and make their purchases; the other places get the go by.

Travelling across this country, either by train or motor, how often is the remark heard: "I'd hate to live in a town like that." On the other hand, when one of our too few little garden towns is reached, people are heard to comment on its attractiveness and to say: "Now there is a place I wouldn't mind living in."

Probably the reason why nothing is done to improve the appearance of most places is fear of the cost. But experience has demonstrated over and over again that the cost of planting trees, of laying out a small park, of keeping the town neat, is comparatively small, while the resulting benefits are large, yielding big dividends on the investment, for, after all, these things are practical, dividend-paying investments just as truly as is the provision of fire-fighting equipment. And if the community as a whole improves the appearance of the streets and paints up, such action becomes infectious and very quickly individual citizens put their private grounds and buildings into shape.

Certainly there is a grand opportunity open to a few public-spirited men and women in most of our Western towns and villages to render real community service by inaugurating Town Beautiful crusades.

The first steamship to cross the Pacific sailed from San Francisco in 1867.

The United States dead letter office received 21,000,000 letters last year which had incorrect addresses.

### English Teachers Visit Canada

His Majesty Conveys Messages to Departing Pedagogues

The party of 100 school teachers from Britain who are visiting Canada, received the following message from His Majesty the King before their departure:

"His Majesty congratulates the league upon the happy conception of the undertaking which will give opportunities to study the educational system in Canada and to gain an insight into her history, development and general resources. The King feels sure that the results of this experience will be fraught with good and far-reaching effects, not only on the teachers themselves but also on those who will in the future come under their influence and instruction and upon the relations between the Motherland and the great Dominion."

"From his recollections of Canada and her warm-hearted people, His Majesty can assure the teachers of the very hearty welcome which they will receive and wishes them God-speed and an enjoyable stay in that vast and beautiful country."

The message was received with enthusiasm by the teachers aboard the Empress of Scotland, on which they sailed for Canada.

### Subdues Sore Throat In a Short Time

When a severe cold grips your throat, when it makes you gag and cough, when the pain you ought to apply good old "Nerviline." This wonderful liniment sinks right in, penetrates to the very core of the affected region. You get a truly wonderful effect from Nerviline, and for sore throat, tight, chest and bad colds nothing else will act the same as truly Nerviline. Five times stronger than other liniments, a city store which subdues power, Nerviline is a necessity in every home. Get a 25c bottle to-day.

### Vancouver A Busy Port

Remarkable Strides Made in the Past Five Years

Forty-two regular steamship lines are now operating out of the port of Vancouver, the gross tonnage for last year being 14,473,518, which is over a million tons in excess of the 1925 figure. Remarkable strides have been made by this port during the past five years, and Vancouver is now rated as one of the leading ports on the Pacific.

Miller's Worm Powders are a pleasant medicine for worm-infested children, and they will take it without objection. When children are infested it will not injure the most delicate child, as there is nothing of an irritating nature in its composition. They will speedily rid a child of worms and restore the health of the little sufferer whose vitality has become impaired by the attacks of these internal pests.

### Homestead Entries

Decline in homestead entries as the settlement of the west proceeds is interesting to contemplate. In 1906-07 and 1910-11 the two largest years in history, Saskatchewan accommodated 27,692 and 25,227 homesteaders respectively. In 1921, 2,729 homesteaders filed on Saskatchewan lands.

Mother's Value This Oil—Mothers who know how suddenly croup may seize their children and how necessary prompt action is in applying relief, always keep at hand a supply of Dr. Thomas' Electric Oil, because experience has taught them that this is an excellent preparation for the treatment of this ailment. And they are wise, for its various uses render it a valuable medicine.

### Clay Products Production

Total Value of Production Last Year Was Close to Six Million Dollars

Including brick of all kinds valued at close to six million dollars, the production of clay products in Canadian plants from domestic and imported clays reached a value of \$11,071,429 in 1924, according to a preliminary report of the bureau of statistics. There were 215 plants in operation last year, representing a capital investment of \$31,716,355, and which provided employment for 4,312 employees, to whom salaries and wages totalling \$4,441,279 were paid.

Nothing Could Stop Her Stevens—"Did your wife pick up driving very soon?" Williams—"Yes, she learned in six weeks."

IMPERIAL TOBACCO COMPANY OF CANADA LIMITED

### Fastest Mail in the World

Chicago-New York Night Air Mail

Gives Wonderful Service

To Chicago and back in forty-two hours, which is exactly what the night air mail means to correspondents between the two cities, is hailed by Lester D. Gardner, editor of Aviation, "in a congratulatory dispatch to Postmaster-General Now as 'the fastest mail service in the world.'"

Actually the letter which Mr. Gardner started for Chicago at five p.m. Wednesday and received on its return at eleven a.m. Friday was in the air only sixteen hours of the total elapsed time. So it is possible to bring about, ultimately, when the service is expanded to day and night both, actual intercommunication over the hundreds of intervening miles within a single day.—New York Telegram.

### Signs of Prosperity

No Business Failures Recorded in Northern Saskatchewan in June

In the whole of northern Saskatchewan was not one business failure was recorded during the month of June, according to J. C. Bell, clerk of the bankruptcy district number two, comprising the judicial districts of Kindersley, Kerrobert, Wilkie, Battleford, Prince Albert, Melfort, Humboldt, Wynyard and Saskatoon. In the half-year ending June 30, bankruptcies were less than half those registered during the first six months of 1924.

Complete in Itself, Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fall to do its work.

It is a fine thing to teach Christianity to primitive people. Christianity should be preserved somewhere.

Minard's Liniment For Burns

### A Thrifty Lover

"Why do you want your love letters returned?" asked the girl who had broken the engagement. "Are you afraid that I'll sue you in court?"

"No," sighed the young man, "but I said quite a bit to have these letters written by an expert, and I may use them again some day."—American Legion Weekly.

# ASPIRIN

Proved safe by millions and prescribed by physicians for

Headache	Neuralgia	Colds	Lumbago
Pain	Toothache	Neuritis	Rheumatism

Safe

Accept only "Bayer" package which contains proven directions. Beware of cheap imitations. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacturing of Monocristalline Aspirin of Salicylic Acid. "A. S." is its chemical name. That Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

## Western Canada To Become A Tremendous Factor In The World Production Of Wheat

"Various leaders of thought in the United States have recently voiced the opinion that the people will soon fall behind Canada as a wheat-producing nation," says the Columbia Post Digest, of Portland, Oregon. "The Dominion," stated Senator Calder, will develop several times the wheat acreage of the United States." Herbert Hoover, secretary of commerce, was responsible for the statement a couple of years ago that the United States would in ten years be a wheat-importing nation. Other outstanding national figures, with their fingers accurately on the pulse of international tendencies, have made similar forecasts.

Such expressions are interesting and significant in a consideration of the future of Canada as a wheat producer. They constitute the opinions of leading individuals of another country on a question of the utmost moment to both that country and the Canadian Dominion. The most logical market for Canadian farm produce is the United States. It is in this direction, as it is in the border line with the United States, and the possibility of the dependence of such an enormous market upon the Canadian product would be a momentous factor in wheat production and marketing and in itself carry a much greater acreage development.

To what extent is Canadian acreage a future factor in world wheat production? Whilst numerous factors of indeterminable possibility enter into this situation this can to some extent be gauged from Canada's present exalted position among the countries of the world as a producer and exporter of wheat, and in the history of her ascension to this position. In the last report of the International Institute of Agriculture, Canada is credited with a spring wheat production of 27,622,000 bushels grown on 22,505,000 acres. This compares with a production of 37,673,000 bushels of both spring and winter wheat grown on 59,559,000 acres in the United States. Canada's yield in 1924 was equal to nearly 12 per cent of the world's wheat crop grown in thirty-one countries, as recorded by the International Institute. The United States wheat crop represented 32 per cent.

Strictly limiting consideration to the possible future bearing of Canadian wheat acreage on the production of this commodity, several factors enter pertinently. There is the enormous reserve of wheat land in western Canada yet to be settled and cultivated. There is the relatively low price at which this land is held which naturally induces settlement and cultivation at a consistent and healthy rate. There are the superior yields procurable over other parts of the continent and other countries. There is the more desirable quality of Canadian wheat from a milling standpoint which is bringing the Canadian product annually into much greater and wider demand.

Whilst other countries are practically standing still or falling away in the volume of their annual wheat crops a consistent increase in the wheat acreage of Canada is yearly apparent and, taking favorable and unfavorable seasons together, a swelling in the volume of the annual crop. Between 1910 and 1920, for instance, the acreage devoted to wheat in Canada increased from 9,224,000 acres to 15,225,374 acres, or by approximately 100 per cent. In the same decade the production of wheat grew from 14,089,690 bushels to 263,159,300 bushels. Between 1920 and 1924 the increase in wheat acreage was about 17 per cent, though production on account of the low yield in 1924 records an increase of just over 3 per cent. Comparing the yield of 1920 with that of the year 1923, however, the increase in production registered is over 80 per cent.

This increase can go on almost indefinitely and it is virtually impossible to vision a time when that vast territory already known as the "Granary of the Empire" will be producing wheat to excess. More than 90 per cent of Canada's wheat crop at the present time comes from the three prairie provinces of Manitoba, Saskatchewan and Alberta. Yet in Saskatchewan, according to estimate, only

84.7 per cent of the cultivable area of the province is at yet under wheat crops; in Alberta 71.5 per cent of such acreage; and in Manitoba only 21.8 per cent. It is still further estimated that there are yet 26,000,000 acres of cultivable lands unsettled within fifteen miles of both sides of existing railways.

### Cheap Rations For Horses

Skim Milk Successfully Used In Bridgeport, Conn., Dairy

Six to seven quarts of skim milk for five pounds of oats is a substitution which has been made in the Mitchell Dairy Company's barn in Bridgeport, Conn., says Horace Dillman. Approximately 340 quarts of skim milk are being used for feeding thirty horses each day. Since the skim milk has previously been notified down the sewer, savings effected amount to about 11c a day, or 16c a year, for each horse. This gives a saving of 13c a year to the owner, which is somewhat above the value indicated by its market price. The substitution is due to the condition and endurance of the Mitchell horses has convinced Fred Bros., who is in charge of the farm's stables, that they have improved since the feeding of skim milk was started. No scales are available for weighing the horses at this stable; but several other stables are now using skim milk to replace part of the grain rations and accurate records of grain saved, milk fed, and weight of horses have been secured from one of these stables.

### Steer Feeding Experiments In Manitoba

Two-Year-Old Steers More Profitable For Winter Feeding Than Yearlings

As the result of tests carried out for two years at the Brandon, Manitoba, experimental farm, it is indicated that two-year-old steers are more profitable for winter feeding than yearlings. In his 1924 report the superintendent of the farm states that, although the yearling steers made more economical gains than the two-year-olds, they did not acquire the finish to command as good a price on the spring market. A summary of the two years' results shows that while the cost of feed per 100 pounds gain in weight was \$12.55 for the two-year-olds as compared with \$10.35 for the yearlings, the profit or labor income per steer was \$3.83 for the former against \$6.90 for the latter. Immature steers take too long a feeding period to be ready for the high price spring market. Good two-year-old steers may, in Manitoba, generally be purchased in the fall more readily than yearlings.

### Tourists Visit National Parks

Alberta Gets Over Half of Traffic to National Parks of Canada

The total tourist traffic to the various national parks in Alberta during the season of 1924 was 135,159, out of a total in all parks of the Dominion of 250,626, according to the annual report of the commissioner of national parks of Canada. The tourist traffic to Alberta parks was divided on estimates as follows: Rocky Mountain Park, 94,280; Waterton Lakes, 18,695; Elk Island Park, 7,817; Jasper Park, 10,675; Buffalo Park, 5,650.

### Was Not Speeding

The motorist was quite certain he did not break exceeding the speed limit, so he was astonished when the village cop held up his hand and brought him to a standstill.

"Say," protested the driver, "I wasn't doing more than ten miles an hour—was I?"

"Oh, that's all right!" replied the officer, "but I'd be obliged if you'd lend me a drop of gasoline. I'm going to a wedding tomorrow and I want to clean my gloves."—Motor Magazine.

### Mirror Starts Fire

The sun's rays shining on a shaving mirror caused a fire in a Berlin home. A concave mirror left standing near a window caught up the sun's rays and reflected them upon the curtain which became ignited. In a few minutes the entire room was aflame.

## Life On A Canadian Farm

Not Quite So Bad As Has Often Been Represented

Mr. Arthur Currie is over in the Old Country telling the people that life on a Canadian farm is not so brutally severe as it has been painted by some who have tried it, without being fitted for it. A farmer's life is not an easy one, wherever his lot is cast; but the fact that two of three million people are living on farms in this country and enjoying the best of health is evidence that there is nothing brutally severe about the conditions surrounding them. The physical weakness can't stand the hard work involved. The incident with an attempt to. Outside, those two classes, almost anyone can make a success and derive enjoyment from life on a Canadian farm, always provided his soul has not been captured by the bright lights and fleshpots of the city. Regina Leader.

## Trade With New Zealand

A Hundred Thousand Wooden Boxes Purchased in Canada

There is an excellent possibility of quite an extensive trade being developed in New Zealand for Canadian box shooks, as a result of the satisfactory showing of an initial shipment of 100,000 boxes to that market recently. The shipment was received in good order and the New Zealand agents reported that they were well satisfied with the quality of wood and workmanship used in the construction of the shooks and that, when in the market for further supplies, consideration would be given to Canadian box manufacturers.

## Motor Vehicles In Canada

Saskatchewan Leads Western Provinces in Number of Cars Operated

Motor vehicles registered in Canada in the past year numbered 650,231, according to the annual report of the commissioner of highways. Ontario, with 209,443 registrations, led all other provinces. Quebec was next with 85,145, followed by Saskatchewan with 70,748; British Columbia, 48,526; Alberta, 48,675; Manitoba, 44,542; Nova Scotia, 17,747; New Brunswick, 20,063; Prince Edward Island, 5,590; and the Yukon, 105.

## Butter Exports To Japan

Good Trade Being Established With Flowery Kingdom

Butter exports from Vancouver to Japan have slightly increased, according to the statistical report of the first six months of the year ending June 24, 1925, issued by the Japanese consuls. The total amount sent to the island kingdom through Vancouver during that period was 165,367 pounds. March was the big month, with shipments of 37,575 pounds.

### Listens to Himself Talk

The Duke of York "listens in" on his radio speeches. A microphone is placed in front of a receiving set at the Duke's speech. When he gets home he listens to himself again on the dictaphone.

The wild digger is probably the only man who can succeed in his life's work by beginning at the top.

## APPROACHING THE HEAD OF THE LAKES

These members of the C.W.N.A. which had greeted them at every step of their journey. The photograph shows the steamer which carried a large party of the delegates, just arriving at the C.N.R. docks at Fort Arthur, Ont.

## Foreign Vegetables And Fruit Too Often Supplied In Place Of Home Grown Product

### Many-Acre Wheat Experiment

Production of Wheat After Different Stubble Treatments

Things are done on rather a colossal scale in Canada's west. At the Dominion experimental station at Swift Current, Saskatchewan, one of some hundred experiments is being conducted on an area covering 75 acres, exclusive of roads and divisions. It is a three-year rotation of fallow, wheat, and wheat that is being followed to ascertain the yields and costs of production of wheat after different stubble treatments. A uniform standard treatment is given in the fallow year, while the second crop land is divided into eight plots of three acres each. A table of results is given in the superintendent's report for 1924, by which it appears that field No. 4, that was spring-burned, ploughed, harrowed, seeded and harrowed, produced the greatest profit per acre, namely, \$32.21, and field No. 7 spring-burned and seeded, the smallest, \$23.37.

### Results Of Egg Grading

Has Led To Gradually Increasing Consumption In Dominion

Egg grading in Canada has proved of great assistance for the export trade which now takes eggs in large quantities—3,711,640 dozens in 1924—with the assurance that they are as represented. The value of grading to the home market and to the industry is equally great, leading to a gradually increasing consumption. In 1901 the Dominion's consumption per capita was about 15 dozen. In 1921 it had risen to 21 dozen, and last year to 26 dozen per head. The Canadian people are now approaching a consumption of an egg a day, and when this is reached about 770 million dozen will be required to meet it.

### Building New Highways

Saskatchewan Leads All Provinces In Mileage Under Federal Aid Plan

Saskatchewan's programme of highway construction under the federal aid plan in 1925 will cover 413 miles. Most of the new highway is already under construction. More mileage has been completed in Saskatchewan under the federal aid plan than in any other province in the Dominion. The statistics showing the province to have over 25 per cent of the 6,000 miles completed in the Dominion.

### Analyzing The World

Sir Leo Chiozza has written an essay on the study of mankind with the title, "The Peril of the White." All the peoples of the world are shown in perspective through a careful analysis of their populations. This is thought to be the first complete account of populations that has ever been attempted.

Messages now can be transmitted at the rate of 120 words a minute on a new cable between New York and Rome.

Are Canadians loyal to their own country's vegetable growers? This is the pertinent question asked by the natural resources intelligence branch of the department of the interior, not without reason. For a glance at the reports showing the foreign vegetables and fruits imported into this country complete a series regarding the common tendency to rate home produce as distinctly inferior to the foreign article. But is it not the plain duty of a patriotic citizen to reverse this fashionable order and support the home grower? Canadians should not lay themselves open to the charge that they are cultivating an extravagant taste for out-of-season and imported vegetables and fruits. The point at issue assumes even greater importance when it is remembered that vegetable and fruit growers are more largely dependent on local markets than other branches of land industry. A good and steady local demand is the strongest incentive possible for the home grower. The cultivation which benefits both producer and consumer.

Admittedly, Canada is so geographically situated that at certain seasons dependence must be placed for a portion of the year on foreign produce and fruit grown in more southerly climates, and certain fruits cannot be cultivated in Canada at all. But making the necessary allowance for this, there still seems to be too great a tendency to cultivate the taste for imported fruits at the expense of the home grower of the country as a whole. Dealers should give more attention to this matter and do what they can to intensify the demand for Canadian home-grown vegetables and fruits.

Farmers of western Canada could in many instances devote more time and attention to growing of vegetables than they are now doing, and with profit to themselves. Also the cultivation of small fruits, adaptable to this country, would afford a great saving and add to the wealth of the prairie provinces.

### Fall Rye and Fall Wheat

Valuable Experiments Conducted At Brandon Experimental Farm

Interesting and valuable experiments in seedling fall rye and fall wheat have been conducted at Brandon, Man., Dominion experimental farm. Relative to rye it was found that September seedling gave better results than August seedling, the date of ripening being only from one to three days later and the yield per acre six bushels and upwards better. If sown too early, says the superintendent in his annual report, the crop will have expended too much energy when winter sets in and is accordingly less winter hardy. The variety of rye used was N.D. 959 and the rate of seedling was a bushel per acre.

As regards fall wheat, that sown September 1 gave the best results, the Turkey Red variety outyielding by a large margin all the spring wheat varieties. The favorable results obtained, the superintendent remarks in his report, however, in the past two seasons are no criterion that winter wheat can be successfully grown in Manitoba. At present, he adds, the growing of fall wheat should be carried on only in an experimental way and on small areas.

### England's Social Problem

It is estimated that since the end of the war nearly £200,000,000 has been spent on unemployment benefit, out-of-work pay, and poor law relief for unemployed persons, with nothing whatever to show for it in the way of production, and with an accompanying and widespread demonstration that of itself presents a most serious social problem.—London Daily Telegraph.

### Speed

On this one fact I'll lay my bet. The slowest man can run in debt. And yet, please note, that debt must thrive. On those who lead the fastest lives.

# BARRE, SON OF KAZAN

James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.

"BARRE, SON OF KAZAN," a Vitaphone Picture, With Wolf, the War Dog. Is an Adaptation of This Story

## Synopsis

Barre was a son of Kazan and Gray Wolf, the latter the mother, a full-blooded wolf. Gray Wolf had lost her sight in a fight with a lynx. During the mothering-time she kept Kazan away from their offspring and it was a great day for Barre when he discovered his father. He was then eighteen days old. And that he ventured out from the windfall in which he had been, and finding himself in the sunlight, had his first great adventure.

## CHAPTER II.—Continued

In a way Barre sensed this. He was not afraid of the owls. He was not afraid of the strange blood-curdling cries they made in the black spruce-tops. But once fear entered into him, and he scurried back to his mother. It was when one of the winged hunters of the air swooped down on a snowshoe rabbit, and the squealing agony of the doomed creature set his heart thumping like a little hammer. He felt in those cries the nearness of that one ever-present tragedy of the wild—death.

"Papayuchew started it, and with a single wild yelp Barre went back in a heap, the owl's beak fastened like a red-hot vise in the soft flesh at the end of his nose."

This rabbit was the climax in the first chapter of Barre's education. It was as if Gray Wolf and Kazan had planned it all out, so that he might receive his first instruction in the art of killing. The fact that Oohoomlew, the big snow-owl, had made her nest in a broken stub not far from the windfall was destined to change the whole course of Barre's life, just as the blinding of Gray Wolf had changed Kazan's, and a man's club had changed Kazan's. The creek ran close past the stub, which had been shivered by

end of his nose. That one yelp of surprise and pain was Barre's first and last cry in the fight. The wolf surged in him; rage and desire to kill possessed him. As Papayuchew lunged on, he made a curious hissing sound; and as Barre rolled and gnashed his teeth and fought to free himself from that amazing grip on his nose, fierce little snarls rose out of his throat.

For fully a minute Barre had no use of his jaws. Then, by accident, he wedged Papayuchew in a crotch of a low ground-shrub, and a bit of his nose gave way. He might have run then, but instead of that he was back at the owl like a flash. Flap went Papayuchew on his back, and Barre buried his needle-like teeth in the bird's breast. It was like trying to bite through a pillow, the feathers were so close and thick. Deeper and deeper Barre sank his fangs, and just as they were beginning to prick the owl's skin, Papayuchew—jabbing a little blindly with a beak that snapped sharply every time it closed—got him by the ear.

The pain of that hold was excruciating to Barre, and he made a more desperate effort to get his teeth through his enemy's thick armour of feathers. In the struggle they rolled under the low balsams to the edge of the ravine through which ran the creek. Over the steep edge they plunged, and as they rolled and bumped to the bottom, Barre loosened his hold. Papayuchew hung valiantly on, and when they reached the bottom he still had his grip on Barre's ear.

At this critical point, when the understanding of defeat was forming its swift swiftness in Barre's mind, chance saved him. His fangs closed on one of the owl's tender feet. Papayuchew gave a sudden squawk. The ear was free at last—and with a snarl of triumph Barre gave a vicious tug at Papayuchew's leg.

In the excitement of battle he had not heard the rushing tumult of the creek close under them, and over the edge of a rock Papayuchew and he went together, the chill water of the rain-swollen stream muffling a final

snarl and a final hiss of the two little fighters.

## CHAPTER III.

To Papayuchew, after his first mouthful of water, the stream was almost as safe as the air, for he went sailing down it with the lightness of a gull, wondering in his slow-thinking big head why he was moving so swiftly and so pleasantly without any effort of his own.

To Barre it was a different matter. He went down almost like a stone. A mighty roaring filled his ears; it was dark, suffocating, terrible. In the swift current he was twisted over and over. For twenty feet he was under water. Then he rose to the surface and desperately began using his legs.

Suddenly Barre found himself at the edge of a deep, dark pool in which the water lay still as oil, and his heart nearly jumped out of his body when a great, sleek, shining creature sprang out from almost under his nose and landed with a tremendous splash in the centre of it. It was Nekik, the Otter.

The otter had not heard Barre, and in another moment Nanpanekik, his wife, came sailing out of a patch of gloom, and behind her came three lithe otters, leaving behind them four shimmering wakes in the oily-looking water. What happened after that made Barre forget for a few minutes that he was lost. Nekik had slipped appeared under the surface, and now he came up directly under his unsuspecting mate with a force that lifted her half out of the water. Instantly he was gone again, and Nanpanekik took after him fiercely.

It was about three o'clock in the afternoon, and the sun should still have been well up in the sky. But it was growing darker steadily, and the strangeness and fear of it all lent greater speed to Barre's legs. He stopped every little while to listen, and at one of these intervals he heard a sound that drew from him a responsive and joyous whimper. It was a distant howl—a wolf's howl—straight ahead of him. Barre was not thinking of wolves but of Kazan, and he ran through the gloom of the forest until he was winded. Then he stopped and listened a long time. The wolf-howl did not come again. Instead of it there rolled up from the west a deep and thunderous rumble. Through the treetops there flashed a vivid streak of lightning. A moaning whiff of wind rode in advance of the storm; the thunder grew nearer; and a second flash of lightning seemed searching Barre out where he stood shivering under a canopy of great spruce.

At first Barre could hardly stand. His legs were cramped; every bone in his body seemed out of joint; his ear was stiff where the blood had oozed out of it and hardened, and when he tried to wrinkle his wounded nose, he gave a sharp little yelp of pain. If such a thing were possible, he looked even worse than he felt. His hair had dried in muddy patches; he was dirt-stained from end to end; and where yesterday he had been plump and shiny, he was now as thin and wretched as misfortune could possibly make him. And he was hungry. He had never before known what it meant to be really hungry.

(To be continued)

The average maple tree yields enough sap to make from five to ten pounds of maple sugar.

## ATHLETES!

Minard's is wonderful for the... Take out the stiffness, soothes the bruises.

## Russian Peasants Are Superstitious

Believed Property Was Damaged As Penalty For Sins

An amazing trial illustrating the ignorance and superstition of the Russian peasantry recently was held in the Minsk district. In order to increase the income of the village priest and to strengthen his authority, over the local peasantry a group of village parishioners resolved to frighten the peasantry with the pretence of a "real" devil in the village.

A village boy was dressed up to resemble a devil. During the night he went to the village dwellers to frighten them. He was instructed to carry out secretly slight damages to peasants' property. This went on for several months, and the ignorant peasants took it all in earnest, as a penalty for their sins. They flocked to the church, induced the priest to hold special services and organized common prayers and religious processions.

A special commission had to be sent from the district town to investigate the peasants' troubles, which were brought to an end only by the arrest of the "devil." The priest and the local authorities were placed on trial and sentenced to many years imprisonment.

## Indian Potatoes Likes Golf

Says Low Score Gives Bigger Thrill Than Shooting Elephants

A rose-turbaned potentate with gold sport shoes is going to chase a little white ball with various sticks on cross-country walks through fairways, jungle rough, desert-like sand traps and velvet greens in Canada and the United States.

The Commodore of Palayampatti and Paladanathan—came from the passenger list—came to New York on the Aquitania recently.

"You Americans come to India to shoot tigers in our jungles," he remarked. "I come to America to shoot golf on your courses." He added that there was a bigger thrill in making a lower score on the links than in shooting an elephant.

He is going to Chicago and San Francisco and return to New York by boat on the way home, and on the journey he will play his favorite game as much as he can.

## Women Equal Men

In Driving Test

Fact They Slightly Surpass Them Says Automobile Association

Scientists and psychologists have determined after a series of tests that women automobile drivers are just as competent, if not more competent than men, the American Automobile Association announced at Washington.

In the tests women were found more competent than men. They are, first, speed with which the driver reacts to danger and takes steps to avert it; second, the consistency with which the driver responds in such a situation. In the first test, the experts found by test of college women and men to react to danger, and men 29 seconds.

In the second test the variability of ten women was only 17 seconds, while that of ten men was 22 seconds.

## Canada's New Headquarters

Building in London Is Famous Union Club Remodelled

A good deal has been published recently about Canada's new headquarters in London, but, perhaps, many do not know that it is the famous Union Club remodelled. This was the club of the great Duke of Wellington, who overthrew Napoleon.

This transformation of an old clubhouse into the offices of a Dominion Government is a unique event. It is a symbol of the blending of old and new which has widened and strengthened the foundations of the British Commonwealth of Nations. Such a conjunction between the haunts of an old club and the busy quarters of a younger government, with its manifold and seeming activities, stimulates the imagination and presents a happy development.

## Horse Sense Saves Them

A writer in Forbes Magazine reveals the somewhat surprising fact that there are more horses in this country by several millions than there are motor-driven vehicles. The horse is not seen often, as his horse sense keeps him off city streets—Detroit Free Press.

YOU quickly remove those "ground in" particles of dirt from linoleum with Sally Ann.

WESTERN CLEANERS LIMITED  
CALGARY, CANADA

The Decline of Pie  
Thomas Masson is complaining of the passing of pie as a feature of every good dinner. There are restaurants in New York, he declares, that regard it as a social error for anybody to ask for so plebeian a party.—New York Sun.

## KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera, infantum, diarrhoea, dysentery, colic and stomach troubles are rife at this time and often a precious little life is lost after only a few hours illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevent stomach and bowel troubles, or if trouble comes suddenly—as it generally does—the Tablets will bring the baby safely through. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Alberta Tar Sands  
Thirteen carloads of tar sands from the Draper leases at Waterways, were shipped east during the months of May and June, for the purpose of experimental road building at various points in the Dominion.

It Testifies for Itself.—Dr. Thomas' Eucletic Oil needs no testimonial of its power over other balms. Whoever tries it for coughs or colds, for cuts or contusions, for sprains or stings, for burns, the doctor will well know that the medicine proves itself and needs no guarantee. This shows why this Oil is in general use.

Passport Officer—"Where are your proofs that she's your wife?"

Henpeck—"I haven't any, but if you can prove that she's not my wife you're a made man."

About 100 tribes of Indians are supposed to have become extinct since Columbus discovered America.

## FOR "Cholera Infantum" MOTHERS SHOULD USE

This valuable preparation has been on the market for over 50 years, and has no equal for offsetting the vomiting, purging and diarrhea of cholera infantum. Put up only by The T. Millburn Co., Limited, Toronto, Ont.

## TIRED OUT ALL THE TIME

Nerves Gave Little Rest

Relieved by Lydia E. Pinkham's Vegetable Compound

Harrowsmith, Ontario.—"I took your medicine before my baby was born and it was a great help to me as I was very poorly until I started to take it. Just before I was tired out all the time and would take weak, fainting spells. My nerves would bother me until I could get little rest, day or night. I was told by a friend to take Lydia E. Pinkham's Vegetable Compound, and I only took a few bottles and it helped me wonderfully. I would recommend it to any woman. I am doing what I can to publish this good medicine. I lend that little book you sent me to any I can help. You can with the greatest of pleasure use my name in regard to the Vegetable Compound if it will serve to help others."—Miss Harvey Miriam, R. No. 3, Harrowsmith, Ontario.

In a recent canvass of purchasers of Lydia E. Pinkham's Vegetable Compound over 100,000 replies were received and 50 out of every 100 said they had been helped by its use. This medicine is for sale by all druggists.

W. N. U. 1568

## BRITISH NAVAL PROGRAM HAS PASSED HOUSE

London.—The House of Commons has put its stamp of approval on the government's cruiser building programme after the Liberals and Laborites had sought to have the appropriations for the warships reduced, on the ground that there was no naval war in sight, and, therefore, there was no need to burden the already heavily taxed country to additional expenditure of £58,000,000.

Ramsey MacDonald, former Labor premier, moved a reduction of the shipbuilding vote, but the house rejected his proposal by a vote of 276 to 140.

There was a great deal of talk about potential trouble in the Pacific, but Winston Churchill, chancellor of the exchequer, and the other government spokesmen steered clear of this subject in their contributions to the debate.

The chancellor, in his official statement respecting the new cruiser building programme, said there was only one menace—that the fleet was wearing out.

Mr. Churchill took occasion to repeat one of his most persistent remarks, that, Britain having immensely modified her whole historic position by agreeing to have a navy of the same size of that of another country, intended to maintain her sea forces not inferior to those of any country in the world.

Several speakers with no government portfolios to incline them to vagueness and generalities had much to say about possible trouble between the United States and Japan, and also about the tendency of the French to increase their submarine strength.

## Press Delegates Have Left For Australia

Old Country Party Will Return

More than 50 delegates from Canada and Great Britain to the Imperial Press Conference in Melbourne, September 29 and 30, embarked here on the liner *Ararangi* for Australia, July 29. The Old Country party, headed by Viscount and Viscountess Burmah, plans to return through the Suez Canal, thus completing a voyage around the world. It will be nearly Christmas when the majority of the party reach England. The sailing date from Fremantle is November 2. The Canadian party, for the most part, will return by way of Vancouver in October.

## Annual Golden Rule Dinner

Paris.—Edouard Herriot, former French premier, has accepted the invitation of the Near East Relief to its annual golden rule dinner in New York, Sept. 29, according to an announcement by the organizers. Herriot has been closely connected with the organization's work for several years and for two years has been chairman of the French observance of Golden Rule Sunday.

## Rebuild Minaki Inn

Winnipeg.—Minaki Inn, one of the Canadian National Railways' summer hotels, which was destroyed by fire last month, will be rebuilt on the bungalow style, similar to Jasper Park Lodge. Announcement to this effect was made following a conference of system officials with Sir Henry Thornton, who states that plans will be developed immediately for the erection of the new inn.

## First Divorce in Far North

Edmonton.—His Honor Judge Ducre, acting as stipendiary magistrate for the Northwest Territories, who returned to the city July 28 from Fort Smith, has granted the first divorce ever given in the Far North.

## May Teach Evolution

Atlanta, Ga.—An amendment designed to prohibit the teaching of evolution in the common schools of Georgia was voted down overwhelmingly in the State House of Representatives.

In a thunderstorm at Almaty, Russia, recently, lightning crashed an altar in a church without damaging it.

W. N. U. 1588

## Welcome Mount Logan Climbers

Conquerors of Canada's Highest Peak Return to Vancouver

Vancouver.—Browned by the glare of the ice peaks of Mount Logan and lean as greyhounds from the hardships of their successful scaling of Canada's most formidable peak, Captain A. H. McCarthy, of Wilbur, B.C., leader of the expedition, Lieut.-Col. W. W. Foster, D.S.O., of Vancouver, H. F. Lambert, of Ottawa, and Henry Hall, Jr., of Boston, returned to Vancouver by boat from Victoria. They received from their friends and admirers a memorable welcome.

Except for Mr. Lambert, none of the mountaineers displays any physical evidences of hardships. Mr. Lambert, owing to the frost-bitten feet, arrived with his feet still encased in moccasins. He is still under treatment.

Col. Foster, the local member of the expedition, declared "there is nothing more to be said about our trip than has been written already."

## Declares Wheat Pool Success

Could Not Expect More For First Year Says Hon. Doherty

Regina.—The Saskatchewan Wheat Pool met with all the success it could reasonably expect for its first year of operation," stated Hon. Manning W. Doherty, M.L.A., for East Kootenai, former minister of agriculture in the Drury Government who assisted in the organization of the pool here two years ago and who was in town for the big rally of the Saskatchewan Wheat Producers' Association at the Stadium in the exhibition grounds.

"The salvation of agriculture," declared Mr. Doherty, "depends on the successful operation and development of commodity marketing and associations of producers."

Dealing with the prospects of the crop this year, the former Ontario minister said that the people of the east were rejoicing in the reports coming through to the effect that the success of the crops now was practically assured.

## Refunding Of Loans

Government Must Finance to Extent of \$165,000,000 This Year

Ottawa.—Hon. James A. Robb, acting minister of finance, who recently returned from a holiday, is turning his attention to the financing of loans maturing during the latter part of the year. Financing to the extent of \$165,000,000 will be necessary this year. As announced some days ago, the first maturing obligation, amounting to five million pounds sterling, on August 12, will be met with a loan. On the 15th of the following month, treasury bills to the amount of \$30,000,000 fall due, and on the first of November, treasury notes to the amount of \$8,000,000 mature. The first war loan of 1915, payable in ten years, falls due on December 1. The amount is \$42,015,000.

Mr. Robb has gone to Toronto, and it is understood he will discuss the question of refunding some of these loans with financial advisers.

## More Farmers For Alberta

One Hundred Young Britons Coming Over This Fall

Edmonton, Alta.—Banks Amesbury, counsel for the overseas settlement board, and himself a member of the board, passed through Edmonton on his way to the coast and thence to Australia, and between trains, Hon. Geo. Howland talked over with him the chances for further British immigration to Alberta this year.

There will be 100 more young Britons coming over this fall, said Mr. Amesbury, and applications are now being received at the board's office in London.

## Four Vacancies to Fill

Ottawa.—The resignation of Hon. J. B. M. Baxter, as member of Saint John, necessitated by his becoming leader of the New Brunswick Conservative party, creates the fourth vacancy in the House of Commons. The other seats vacant are Compton, Quebec, held by a Liberal; East Hastings, a Conservative; and West Middlesex, by a Progressive. If there is not a general election, by-elections in these constituencies will inevitably be necessary.

## PROPOSAL TO TAX RAILWAYS ON A MILEAGE BASIS

Winnipeg.—Suggesting that the Manitoba Government consider adoption of a policy of taxing railways on a mileage basis instead of gross earnings, Sir Henry Thornton, president of the Canadian National Railways, Major G. M. Bell, deputy minister of railways, and M. Gardiner, member of the Canadian National board, conferred with Premier Bracken here.

Premier Bracken believes the proposed scheme inequitable, on the ground that Manitoba, with small mileage and big business, would suffer at the expense of provinces where mileage is great and business small. The railway officials, it was stated, plan to submit the proposal to other provincial governments on their trip west, and confer with Premier Bracken on their return journey.

## Cost More To Harvest Crop

More Binder Twine Will Be Necessary For Heavy Straw

Winnipeg.—If most Canadian farmers one-fourth more to harvest their crops this year as compared with normal seasons. The differences will be accounted for by the proportionately heavy straw. This applies to the twenty million acres of wheat as well as ten million of oats and three million acres of barley, rye and flax. It will be paid out to 60,000 harvesters and binder twine manufacturers but the difference in freight rates over other years will favor the producer by some five to six cents per bushel, more than enough to offset the loss in the other direction.

Official and unofficial estimates of total yield from half a billion of wheat to three hundred and fifty million bushels. Heat, moisture, rust and parasites must be reckoned with, but the general harvest is almost in sight. Those who must buy grain are inclined to over-estimate the yield and the producer and his organizations invariably take the pessimistic angle. This is the history of the grain industry and is not confined to western Canada.

## Prepares For Prince's Visit

Buenos Aires.—The senate has voted an appropriation of 400,000 pesos (about \$160,000) to entertain the Prince of Wales during his coming visit to Argentina. British subjects in Argentina are preparing numerous festivities in honor of the Prince. His picture is making its appearance everywhere.

## Japanese Alpinists Climb at Jasper

Headed by Yuko Maki, under secretary of the Japanese Alpine Club, six noted Japanese Alpinists have left Jasper Park Lodge, at Jasper, Alberta, for a twenty-five days' trip into the Columbia icefield, one of the least-known portions of the Canadian Rockies. Their trip will take them to the headwaters of the Athabasca and North Saskatchewan rivers, and an endeavor will be made to climb Mount Alberta, a virgin peak which has so far defied all efforts to conquer its higher slopes. Members of the party state that if the territory lies up to their expectations it will attract hundreds of Japanese Alpinists annually. The expedition is elaborately equipped scientifically and the equipment

## Federal Election Speculation

No Announcement Is Expected For Some Days Yet

Ottawa.—It is now stated here on good authority that there will be no more meetings of cabinet until after the New Brunswick election on August 10. In that case it is improbable that there will be any announcement in regard to the holding of an election this autumn, for a couple of weeks. It has been taken for granted that the government will await the New Brunswick result before deciding whether or not to go to the country this autumn. If it should prove favorable to the government now in power, it will be a factor in determining the federal premier to make his appeal. If it should be unfavorable, it will be an added argument for those who are counselling delay. For the present, apparently, the question of holding an election before the snow flies must remain unchanged.

## New Grain Act

Revised Act With New Regulations Has Now Come Into Operation

Ottawa.—The Canada Grain Act as revised at the last session of parliament became effective August 1. The order-in-council authorizing the application of the new regulations has been passed and the official proclamation will be made in The Canada Gazette this week.

The new Grain Act was one of the most important measures before parliament last session and a special committee gave several weeks to its consideration. The amendments to the old act were chiefly respecting the operation of elevators, the weighing and grading of grain. All terminal elevators under the present act can be put under the control of a commission. If the government so orders, though such action is regarded as unlikely.

## Not Coming To States

Duke of York Is Not Expected Next Year

London.—It is understood that while the Duke of York, youngest brother of the Prince of Wales, has accepted the honorary presidency of the World Forum of Freedom at Yorktown, Va., he is not expected to go to Yorktown next year as New York dispatches have stated he would do. Recently it was announced in New York that the World Forum expected the Duke to visit Yorktown next year. The purpose of the forum is to restore and perpetuate the Yorktown battlefield, where the British commander, Lord Cornwallis, surrendered to the armies fighting for American independence in October, 1781.

## TREATY RELATING TO CHINA WILL NOW BE RATIFIED

Washington.—Arrangements are being made at the department of state for the formal exchange of ratifications of the nine-power treaty relating to China, which was signed at the time of the Washington armistice conference.

Notification has been received that the necessary documents from Paris showing the French action in ratifying the treaty would reach Washington within the next few days. France was the last of the nine powers to ratify.

The treaty is that providing for a commission to revise Chinese customs, to provide the Chinese Central Government with a five per cent. ad valorem duty on imports. The assembling of this commission is looked to as the first essential step in stabilization of conditions in China, in order to insure adequate protection of foreigners.

## Increase In Passport Issues

Unusual Number of Canadian's Are Going Abroad This Year

Ottawa.—Canadians are travelling abroad this summer to a greater extent than usual, judging by the number of passports issued. The heavier movement is always in the months of March, April and May, although the classes that are better to do travel more in July and August. Since the opening of the St. Lawrence season, the passport issue has averaged nearly 5,000 a month. By the end of the year the total will aggregate over 20,000. As the fee has been raised \$5, this becomes a rather substantial source of revenue.

As British subjects coming to Canada do not require passports, repeated efforts have been made to secure the same privileges for Canadians when going only to the British Isles. The Imperial Government, however, takes the stand that identification of all persons landing in the country is necessary, and that no method is less troublesome in the long run than the passport.

## Alberta Rates Case

S. B. Woods, K.C., to Represent Province Before Railway Commission

Edmonton.—S. B. Woods, K.C., of Edmonton, has been appointed by the Alberta Government as provincial freight rate counsel, and will represent the province before the railway commission when it holds its investigation into the freight rate question. He will take the Alberta side of the case only, and will not be associated with any other argument before the commission.

Two objectives, in particular, will be sought in connection with this province's case before the rate commission, according to Premier Greenfield. These will be a through rate on coal and grain westward on the same basis as the Crow's Nest tariff. The movement of coal will be emphasized as a matter of national importance, and the commission will be asked to establish a favorable rate that will make it commercially possible.

## Invents New War Weapon

Detroit Man Will Give Demonstration On U. S. Battleship

San Francisco, Cal.—Demonstration of a destructive force which he has invented will be carried out on a United States battleship off the coast of California, Dr. Edwin R. Scott, of Detroit, has announced.

Dr. Scott, who is said to have sold the French Government the "Alkali" artillery shell during the world war, calls his new munition the "dash stroke." He claims it will kill life wherever it comes in contact with within a radius of 20 miles. The naval demonstration is to take place within two months, the Detroit inventor said.

## MacMillan Party "All Well"

Washington.—The steamers *Bowdoin* and *Peary* of the MacMillan Arctic expedition, left San Francisco, Greenland, July 27, and proceeded north to Melville Bay, according to a radio message dated July 27, received by the National Geographical Society, via Seattle. The message adds "all well."

## Along the Banff-Windermere Highway

This is the Banff-Windermere Highway. It really needs no introduction for it is numbered among the most famous and most perfect Motor highways in the world. Above are the latest pictures of some of the country it passes through and some of the mountain goats one is sure to encounter just outside Banff.

Here is what the "Motor News" says about it: "This wonderful highway, wide and smooth and hard and level as any the old Romans or the modern Americans ever built, is in the Canadian Rockies. For 114 miles it twines its tortuous way through unbelievably magnificent mountain scenery, from Banff, the world-famous resort in Alberta, to Lake Windermere, in British

Columbia, clinging to the brim of sheer precipices, cleaving through sheer canyons, skirting giant mountains, spanning giant rivers, overlooking giant valleys and affording the most soul-shaking views of rivers and valleys and mountains stretching away and away, ever so far, ever so deep, ever so high, for ever and ever, amen."

The mountains goats and sheep, incidentally, are quite tame and little groups of the mild-mannered creatures not infrequently make themselves at home in the middle of the roadway and gaze wonderingly at the Lord of Creation who wait impatiently in their cars for permission to pass.

## Japanese Alpinists Climb at Jasper

**H**EADED by Yuko Maki, under secretary of the Japanese Alpine Club, six noted Japanese Alpinists have left Jasper Park Lodge, at Jasper, Alberta, for a twenty-five days' trip into the Columbia Icefield, one of the least-known portions of the Canadian Rockies. Their trip will take them to the headwaters of the Athabasca and North Saskatchewan Rivers, and an endeavor will be made to climb Mount Alberta, a virgin peak which has so far defied all efforts to conquer its higher slopes. Members of the party state that if the territory lives up to their expectations it will attract hundreds of Japanese Alpinists annually. The expedition is elaborately equipped scientifically and the equipment includes still and motion picture

cameras and a complete dark room with which pictures will be developed in the field. Three Swiss guides, Hilarich Fuhrer, Hans Kohler, and Jean Webber, from Jasper Park Lodge, are accompanying the party and five guides and forty horses from the outfitting stables of Fred Brewster, are being used on the trip. This is the largest party which has left the Lodge this year, and the first party of Japanese Alpinists to tackle some of the untried fields of the Canadian Rockies.

The party is shown ready for the start from the Brewster ranch. Left to right—N. Osabe, M. Hatanaka, Y. Mita, S. Hashimoto, Y. Maki, Fred Brewster, Outfitter; H. Fuhrer, J. Webber, H. Kohler, Swiss Guides.

## DEUTSCHE ZELT VERSAMMLUNGEN IN STONY PLAIN.

Lectueren ueber weltweite Fragen  
werden jeden Abend geliefert werden.

## Here and There

Conditions in the fruit areas of British Columbia are reported as satisfactory. Weather conditions have been good and the trees are healthy.

According to recent reports general conditions in the Maritime Provinces are normal. Potato seeding is about complete. Trees in the Annapolis fruit districts are in good shape and estimates point to a normal crop.

A consignment of lumber from South Westminster, B.C., arrived recently at Dorval, Quebec, on the Canadian Pacific line, consisting of twenty-nine logs of Douglas Fir, some of which were so long that three flat-cars were required to carry them.

Field Marshal Earl Haig and Countess Haig travelled through western Canada to the Pacific coast over the Canadian Pacific Railway recently, after attending the conference of the British Empire Service League at Ottawa.

"Western Canada has never had better crop prospects than which exist now," stated Ernest G. Cook, of E. Cook Ltd., Crop Insurance Co., of Moose Jaw, Sask., who recently spent two weeks at Banff, after touring the West and studying crop conditions.

According to "Agricultural and Industrial Progress in Canada" the Department of Trade and Commerce has issued the following comparative statement for 1924 and 1925 trade in the Dominion:

	1924	1925
Trade	\$1,202,130,164	\$1,878,284,180
Imports	\$82,260,297	\$96,022,537
Exports	\$1,058,768,237	\$1,851,561,643
Fav. Bal.	165,206,430	284,429,108

According to the Dominion Bureau of Statistics the annual consumption of standing timber for use, amounts to about 2,600,000,000 cubic feet. The loss by fire, insects and fungi about doubles this depletion, and it is estimated that Canadian forests are depleted at the rate of upwards of five and a half billion cubic feet per annum.

For the first time in the history of Canada upwards of three thousand redskins from the four western provinces and Montana journeyed to McLeod, Alberta, early in July, and held an all-Indian celebration and formed a league of plains Indians. Five thousand white people attended the ceremony and watched the Indians stage their spectacular mounted war-dance.

## WORLD HAPPENINGS BRIEFLY TOLD

The Rockefeller Institute of New York has donated \$200,000 for the erection of an institute of physical chemistry in Madrid, Spain.

An anti-luxury society has been formed at Tokyo by students. It hopes to induce the wealthy people of Japan to discontinue habits of luxury.

Consummation of the European security pact, in the opinion of President Coolidge, would lay a broad foundation for further disarmament.

According to the city directory just issued for this year, the population of the Greater Vancouver area is figured out at more than 250,000.

A giant meteorite in Colorado is to be explored for its platinum content. Small quantities of radium recently were isolated from a meteorite.

No further announcement of their cancer work will be made by James E. Bernard and Dr. W. E. Gye, until autumn. This is stated in London on authority.

Mrs. O. L. McCracken, wife of a ranchman at Helena, Montana, has paid all her daughter's school bills by carving agricultural dolls out of the roots of cottonwood trees.

Monday, October 26, is the tentative date for the opening of the 1925 session of the British Columbia Legislature, it is reported. Last fall the session started November 3.

The City of Hull, England, at its Weekly civic week meeting, decided to adopt some city in each of the dominions and colonies within the empire toward which it could concentrate on overseas activities, including emigration.

As the result of a lawsuit which has been proceeding for 30 years, the standing timber on a great stretch of forest formerly plucked by the Schoen born family of Valke Lueky, Bohemia, is to be sold by auction for the benefit of the Ruthenian peasants of the district.

Hon. Charles Stewart, minister of the interior, Hon. R. Dandurand, government leader in the senate, and Hon. P. C. Larkin, Canadian high commissioner in London, will be Canada's representative at the meeting of the assembly of the League of Nations in Geneva in September.

World Poultry Congress Canada will entertain the International Association of Poultry Husbandry during the early summer of 1927, according to a statement issued by the federal department of agriculture.

Last year this association met in Spain, and the Canadian exhibit of poultry there attracted much attention.

## New SMP Enamelled Sink

Price Complete \$13.00

Best value ever offered. Made of Arcon Iron, enamel with special SMP White Enamel. Centre drains with or without tap holes. Price includes all fittings.

Also the SMP Enamelled Drain Board

Price \$6.50

White enamel Arcon Iron, strong, rigid, very heavy; also unique value. Fit snugly to sink. A real plumbing sensation. Price includes all fittings. Sold by plumbers, hardware stores, or write direct to:

## Saskatchewan Clays

New Company Incorporated to Manufacture Clay Products

Manufacture of white stoneware, wall tile, floor tile, sanitary ware, terra cotta, dinnerware and hotel china from Saskatchewan clays will be undertaken by the International Clay Products, Limited, a new company just incorporated at Regina.

Half a section of clay land near Redlyn and another 320 acres near Knollys, in the southwest of the province, have been acquired by the company, which is capitalised at \$150,000, of which \$50,000 preferred stock will be offered to the public shortly. The company has acquired the plant formerly operated by the Estevan Brick and Coal Company, including 200 acres of coal property.

## Canada's Greatest Need

Immigration Believed To Be the Outstanding Need For the Betterment of Canada

Immigration is Canada's greatest need at the present time and that this opinion is shared by thinking men who have the welfare of the Dominion at heart, is evidenced in the fact that at the recent Kiwanis International congress, held in St. Paul, attended by some 5,000 business executives, delegates representing every town and city of importance in Canada, endorsed a resolution guaranteeing their earnest support in working out what they believed to be the outstanding need for the betterment of Canada—immigration.

The Text Explained and Illuminated The second missionary journey planned, verse 36—"After some days"—an indefinite expression denoting a considerable lapse of time—Paul suggested to Barnabas that they revisit the churches founded on their previous journey and see how they were faring.

"He would visit them that he might acquaint himself with their case, and impart unto them such spiritual gifts as were suited to it; as the physician visits his recovering patients that he may prescribe what is proper for the perfecting of his cure, and the preventing of a relapse" (Matthew Henry).

On that previous journey they had suffered much. They had been expelled from Antioch of Pisidia, they had been driven from Iconium with threats of stoning, and at Lystra Paul had been stoned and left for dead outside the city. Now Paul proposes retracing the same route.

"Give us the courage that prevails. The steady faith that never fails." (Van Dyke).

World's Longest Railway Read Completed in Australia is 5,433 Miles Long

The longest railway in the world is now complete by the recent laying of a connecting link, making a continuous line of track from Melbourne, in west Australia, to Deajarra, in Queensland, a distance of 5,433 miles. The line from Halifax to Vancouver, Canada, via Canadian National Railway, is 3,787 miles, and, by way of the Canadian Pacific Railway, 3,642 miles.

These two are direct lines, whereas the Australia distance is the result of a connecting up of two systems.

Paring a corn is both risky and ineffective. It is much better to use Holloway's Corn Remover and eradicate them entirely.

Answer This Jacob—Does my birthday come on Monday this year?

Mother—Yes, dear.

Jacob—And last year on Sunday?

Mother—Yes, dear.

Jacob—Umph! On how many days in the week have I been born.

Eczema On Hands For Two Years Cuticura Healed

"For about two years I suffered with eczema on my hands. It started with small scales and then turned to a rash and was very sore and red. It itched terribly at times and kept spreading until my fingers were covered with it. I could not put my hands in water nor do any work. I did not get much sleep at night on account of the irritation."

"I used other remedies without much success. I saw Cuticura Soap and Ointment advertised and sent for a free sample. After using it I purchased more and in a month's time I was completely healed." (Signed) Lawrence Chasvin, West Chazy, N. Y., Sept. 27, 1924.

Make Cuticura Soap and Ointment your every-day toilet preparations. Use the best skin, soft smooth hands, and a healthy scalp with good hair. Cuticura Soap is unsurpassed in purity.

### Stony Plain and District.

On Wednesday July 29, to  
the wife of Mr Roy Meads, a  
son.

Holborn U. F. W. A. held  
their annual picnic on Sunday  
last at Edmonton Beach, which  
was well patronised. A dainty  
lunch was served, to which all  
did ample justice.

The dance Saturday even-  
ing at the Gitzel Ranch, Gar-  
den Valley, was well patron-  
ised, a large number being  
present to trip the light, fan-  
tastic.

Somany dancers were pleas-  
ed at the good time they had  
at the opening of Mr George  
Kulak's dance hall a short  
time ago, they returned last  
evening and crowded the hall  
to the doors. Barths supplied  
the excellent music.

The big attraction Friday,  
August 14, will be the dance  
at Holborn Hall by Helge  
Anderson's famous Orchestra.

A big shoot took place yes-  
terday at the Rifle Ranges  
between the town people and  
agriculturalists. A crowd  
shot to include all members  
of the Rifle Club is being ar-  
ranged.

A meeting to organise a  
livestock pool was held last  
week in Schwind's Hall, at  
Spruce Grove. The chair was  
taken by Mr Burns, and the  
principal speaker was Mr W  
F Stevens of the Dept. of Ag-  
riculture, who explained the  
aims and objects of the pro-  
posed Pool. Several local  
stock producers expressed  
their views, after which the  
names of those present were  
enrolled, and a committee ap-  
pointed to enroll members.

A quarter section of land  
5 miles west of Stony was put  
up for auction on Saturday  
last, by Auctioneer Zuehl in  
front of the local Postoffice.  
John Armbruster bid \$2,000;  
this being the only bid, the  
reserve bid was \$2550, and  
the sale was called off.

The new regulations re-  
garding the necessary quali-  
fications of applicants for nat-  
uralization papers have been  
received, and are now on file  
at The Sun Office.

### New Alberta Spuds on Market

New potatoes from local  
farmers have at last made  
their appearance on the Ed-  
monton markets, but the  
quantity is by no means large,  
and it will be a little while  
yet before they are being  
handled in shipments large  
enough to cause any price  
changes on the deliveries from  
the coast. Quotations for  
Alberta grades would range  
around \$60 per ton, about the  
same price as the coast trade  
receives for shipments here.

### Calendar.

Aug. 7—Inga M.D. meets in Stony  
Plain.  
10—Judging in the local Gar-  
dens Competition.  
12—Women's Institute Picnic  
at Edmonton Beach.  
14—Dance at Holborn Hall, by  
Helge Anderson's Orchestra.

### Stony's Successful Pupils.

The results of the Depart-  
mental examinations in the  
local High school show that,  
of 11 pupils in grade 11, 5  
passed and 1 was condition-  
ed. The successful ones are—  
The Misses Kathleen Powell,  
Bertha Washburn, Amelia  
Foerster, and Messrs D. Mar-  
tin and R. Pinchbeck.

Grade 9—Passed, Clarence  
Anderson. Passed in 5 sub-  
jects, W Smith; passed in 4  
subjects, Etta Stanb and A  
Mohr.

### Wedding Announcement.

Mr and Mrs Clas E White  
announce the wedding of  
their eldest daughter Annie  
Violet, to Mr Edward James  
Kibblwhite, son of Mr and  
Mrs E J Kibblwhite of Ver-  
million; the marriage to take  
place quietly in August.—  
Vernilion Standard, July 30.

### A Silver Wedding.

Mr and Mrs John Ducholke  
celebrated their silver wedding  
on Sunday last, at their home  
east of town. A large number  
of friends and acquaintances  
were present, and joined in  
congratulations to the worthy  
couple. They also were the  
recipients of appropriate pres-  
ents commemorative of the  
occasion.

### Wedding at Blueberry

At the Ruthenian Catholic  
church at Carvel, on Saturday  
Aug. 1, Kathleen (daughter  
of Mr and Mrs John Schmi-  
gelski) was united in mar-  
riage to Mr John Poushkar-  
off, of Stony Plain district.  
The ceremony was performed  
by Rev Mr Reddeko, the  
pastor.

After the ceremony the  
bridal party and numerous  
guests adjourned to the home  
of the bride's parents at Blue-  
berry, where a recherche de-  
jeuner (as they say in France)  
had been prepared for the oc-  
casion by a squad of cooks.  
All the favorite Rusky edible  
dainties such as hullepohau,  
snaballa, roastpigsley, etc.,  
were on the menu, and these  
were showered on the guests  
in a prodigal manner. Chief  
"Big John" was on hand, and  
seen the guests had all their  
wants attended to. He was  
ably assisted by the master of  
ceremonies, Major Masenko,  
who also acted in the capacity  
of complaint adjuster.

The dancing part of the  
festivities was not neglected,  
an imported orchestra under  
Mr Fox Trotsky discoursing  
sweet music. The dance hall  
was comfortably filled "at  
all times, and the national dances  
given were greatly admired  
by the native visitors and  
guests. The festivities were  
conducted in the good old  
way, but finally came to a  
close early this week.

The happy couple have  
taken up their residence in  
the house of Mr Jac Urshel  
Jr., near which place Mr  
Poushkaroff farms.

### Stony Plain and District.

P Gornowka, Edson, is vis-  
iting this week with friends  
at Glory Hills.

A few inquiries are being  
heard as to the progress being  
made on the projected Mer-  
idian road.

Inspector Piper of the Al-  
berta Provincial Police was  
a visitor in Stony Sunday  
last.

Work was begun this week  
on renewal work on the Gov-  
ernment Phone line on the  
Baseline from Blueberry  
west. A large gang is at  
work, the supplies going out  
from Carvel Station.

Edmonton Beach seen a  
record crowd on Sunday last,  
who motored thither for a  
real days sport. The bathing  
beach, was crowded during  
the afternoon and early even-  
ing. Monday being a holiday  
in the city, brought a lot of  
City people to enjoy the cool  
breezes.

### Crop Report.

Crop conditions throughout  
Stony Plain district are the  
best in years, and a feeling of  
optimism among farmers and  
town folk alike is quite evi-  
dent. The recent warm weath-  
er has brought on crops of all  
kinds, and it is only a matter  
of a short time when the whirr  
of the binders will be heard  
everywhere. Wheat-cutting  
around here will commence  
about a week from to-day, on  
the 13th, or thereabouts.

Harvesting of spring-seed-  
ed grain commenced at the  
Olds Experimental Farm last  
week, with the cutting of  
three early varieties of barley.

The early cutting of grain  
in this district will constitute  
a record, beating by some 10  
days the date on which it  
started two years ago.

### Death of Mrs Kate Mayer.

Mrs Kate Mayer, relict of  
the late Mr Jacob Meyer, died  
on Monday August 3d, in an  
Edmonton hospital.

The remains were brought  
to Stony Plain Monday even-  
ing for burial. The funeral  
took place yesterday at St  
Matthew churchyard, the ser-  
vice being conducted by Rev  
Mr Mueller.

She leaves to mourn her  
loss, one daughter, Mrs Philip  
V Kulak; and four sons, Carl,  
Jacob K., Louie and Willie.

### Keep Off Summerfallow

Farmers are urged to keep  
off their summerfallow during  
the whole of August and the  
first half of September, as  
this is the time when the  
cutworm moths lay their eggs.

As they will not touch land  
over which there is a crust,  
it will lessen the danger next  
year if the land is left undis-  
turbed during this period.
